KEY DUTIES & ACCOMPLISHMENTS

- Worked on a wide range of projects, including numerous company websites/applications, android apps, a 3D mobile game, and various HTML 5 Canvas games/tools for clients
- Designed a diversity of graphics for digital and print, including complete branding packages, advertisements, products, brochures/literature, labelling/signage, and much much more
- Built robust and beautiful websites specified to the client's needs using primarily HTML/CSS/JS/PHP or CMS' such as Wordpress. Also and custom plugins that catered
- Worked with clients throughout every stage of their website & graphic design projects
- Engineered custom catered project back-ends to allow clients to easily control their website on their own in the capacity they requested
- Collaborated with fellow designers and copywriters using techniques like SCRUM and task boards to ensure everything was done on schedule
- Built large scale, powerful applications such as full-featured E-Commerce solutions with highly complex product pricing and order forms, an online survey building tool, and DIY designer tools for customers to submit their artwork for print/production
- Created, Managed & Maintained clean, efficient and secure hosting environments for each new website project, email server, and repository.
